

PLUST PRESENTS "AN OUTDOOR STORY" – AT THE SALONE DEL MOBILE, MILAN 2019

Plust will be presenting some new families of products, consisting of outdoor chairs and tables at **Hall 10, Stand D14** at the **Salone del Mobile.Milan from 9 to 14 April 2019**.

To celebrate September as the slow farewell to summer, Plust launches the armchair and three-seater sofa from the **Settembre** collection designed by **Luca Nichetto**. The rounded shapes and soft appearance of the curved surfaces are designed to improve comfort without the need for additional upholstery. A gap between the seat and the backrest allows rainwater to run off while a hole for inserting lights transforms the **Settembre** armchair and sofa into a real luminous sculpture.

The chair and table of the **Chloé** collection, designed by **Berenice Studio**, evoke the reminiscences of classical art but with a contemporary character. The harmonious, rounded lines and compact shape suit all settings. A preview of the model in the colour 'Coral' will be unveiled at the Show.

Eclectic aptly describes the **Planet** chair by designer Cédric Ragot. Already presented in 2017, it has been revisited and reinterpreted to deliver better functionality. The wooden radial structure of the legs has been replaced by a lightweight structure in aluminium, a material better suitable to outdoor use. The result is a practical and easy-to-move seat that adapts well to different environments.

Fura, the totemic table designed by **Form Us With Love**, now also comes in a dining-table version. Its conical base gives good stability and the HPL top makes the product durable over time. In set-up at the Salone del Mobile, it will be combined with the **Planet** chair.

An example of the typical versatility of **Plust** is the prototype of **Philippe Tabet's** chair, born from the desire to create an innovative PE chair that can be adapted to different situations by adding arm-rests. Its relatively contained and sinuous shapes make it ideal for both indoor and outdoor use. The chair is available in different variants, with or without arm-rests, which are obtained from the same mould thanks to a system of plugs.

The complete press kit is available at press.rotajorfida.com/plustcollection.
