TESTS

Test carried out in the laboratory

Attention to ensure stability under a vertical pressure, the part must be stabilized according to point 7.2 of EN 1730:2012. To do this, inert material (es. dried sand) must be poured into the hole at the bottom of the base. The amount of the material will vary according to the article:

art. A4927 - A4928 Ø70 cm - kg 9
art. A4931 - A4932 Ø80 cm - kg 12
art. A4930 - A4929 70x70 cm - kg 15
art. A4933 - A4934 80x80 cm - kg 27

Finally, close the hole by screwing the threaded cap back on.

Alternatively it is necessary to apply the stabilization base Ø 51 cm (A4197 or A4194) on the bottom of the plastic product without introducing inert material (dried sand).
