TESTS (ART. 6310)

Attention to ensure stability under a vertical pressure, the part must be stabilized according to point 7.2 of EN 1730:2012.

To do this, inert material (es. dried sand) must be poured into the hole at the bottom of the base. The amount of the material will vary according to the article:

art. A4626 120x60 cm - kg 24

Finally, close the hole by screwing the threaded cap back on.
